

June 2018

The SPIEGEL-Group is one of the most respected German media houses.

Our print magazines, TV productions and online offers occupy an outstanding position in the German media landscape.

DER SPIEGEL, Germany's most important and Europe's largest news magazine, is read in more than 170 countries. For many years, we have worked together with KOLOR-D technology from KlearVision in image management.

Along with the restructuring of our house, the requirements for the system KOLOR-D were adjusted.

We have succeeded in achieving the essential goal of generating a fully automated image processing workflow, through KOLOR-D Color technology. At the same time the authentic imagery of our house was secured for printing and optimally processed.

KOLOR-D is automatically processing images, received from our various photographers and other sources.

KOLOR-D value is in high quality result, reliable, high efficiency and easy integration in our workflow. In the meantime, we also supply the derivatives of our company beyond SPIEGEL.

The KlearVision team is a reliable and competent partner with fast support.

We thank you.

DER SPIEGEL
